EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. This application is in condition for allowance except for the presence of claims 1-13, 20-23, and 27 to inventions non-elected without traverse.
3. Accordingly, claims 1-13, 20-23, and 27 have been cancelled.
4. In the specification, p. 1, line 4, " , now U.S. Patent 6,297,293" has been inserted after "1999".

Allowable Subject Matter

1. Claims 14, 16, 24-25, and 31-32 are allowed.
2. From a prior Office action:

The closest prior art, Firsich, discloses porous carbon monoliths having variable densities, surface areas of over 500 m²/g, electrical conductivities of about 25 S/cm, capacitances of over 200 F/g, where the carbon materials are made by carbonizing polymer powder/carbon powder blends (col. 2 line 49-col. 3 line 9). An example shows a carbon material having a density of 0.75 g/cc, electrical conductivity of 20 S/cm, and a surface area of 750 m²/g (example 1). However, the reference teaches away from an activation step, regarding this step as disadvantageous. Therefore, it is the examiner's position that the applicant's claimed porous carbon monolith materials are novel and unobvious over the prior art.
